

# *1941 Plymouth Sedan Delivery*

This is an extremely rare vehicle. The Sedan Delivery had a production run from 1935 to 1941. The second biggest production, 1941, produced 3200 units. My research indicates less than a dozen exist from the entire production run. They were licensed as commercial vehicles, allocated more fuel during the war years, worked hard and driven to death. This survivor is an original P11 chassis, steel body and has all the exterior chrome, thus making it even more unique.

# FOR SALE

**\$15,000**
